SAFETY and GENERAL INFORMATION

Save these instructions. For your safety *read, understand, and follow* the information provided with and on this stand before using. The owner and operator of this equipment shall have an understanding of the stand and safe operating procedures before attempting to use. The owner and operator shall be aware that use of this product may require special skills and knowledge. Instructions and safety information shall be conveyed in the operator's native language before use of these jack stands is authorized. If any doubt exists as to the safe and proper use of these jack stands, remove from service immediately.

Inspect before each use. Do not use if broken, bent, cracked, or damaged parts (including labels) are noted. Any stand that appears damaged in any way, operates abnormally or is missing parts, shall be removed from service immediately. If you suspect that the stand was subjected to a shock load (a load dropped suddenly, unexpectedly upon it), immediately discontinue use until the stand has been checked by a factory authorized service center (contact distributor or manufacturer for list of authorized service centers). It is recommended that an annual inspection be done by qualified personnel. Labels and owner's manuals are available from manufacturer.

OPERATION

⚠ *This product should **NEVER** be used to lift or lower a vehicle.*

To Raise

1. Turn adjusting handle clockwise until saddle contacts load. Be sure to center load on saddle.
2. On Model BH5715, slight upward adjustment can be made to the saddle height by pressing downward on the foot pedal. This may or may not be necessary depending on the application. It is provided as a means of making temporary adjustments on load height without using your hands. This leaves your hands free to engage, handle and control the workpiece.

⚠ *Do not lower overhead lift in order to accommodate the stand. Contact with the desired vehicle component shall only be done by means of the vertical adjustments provided on the stand.*

To Lower

⚠ *Make certain that all personnel are clear of the load before lowering. Watch and **control** the rate of descent of the load **at all times**.*

To lower, simply turn adjusting handle counter-clockwise.

MAINTENANCE

Periodically inspect each stand. Ensure all parts move freely. Apply grease to fitting as needed. If rust appears, sand affected area and cover with suitable utility paint.
